

MOTOR TRUSPEED REPAIR

MOTOR TruSpeed Repair is a white-label Software as a Service (SaaS) solution for enterprises looking to bring OEM service and repair content to their customers quickly. With MOTOR TruSpeed Repair, you get a vehicle service and repair solution that allows for out-of-the-box deployment for a faster time-to-market with customization that aligns with your company's branding. It offers solutions providers expanded OEM service and repair content including ADAS within days of being published by the OEMs (including revision updates), ensuring users have the most up-to-date information to repair and service vehicles correctly the first time. Users get access to advanced search capabilities to speed up the repair process in an easy-to-use interface.

FEATURES AND BENEFITS

POPULAR USES

- Integrate with scan tools, shop management software, point-of-sale systems and electronic parts catalogs
- Fix vehicles quickly and correctly the first time with access to all the latest service repair details
- Reliable source of repair information for the DIY market wanting access to repair content as authored by the OEM
- Increase sales and reduce damaged part returns due to incorrect installation with the addition of repair procedures with parts purchases
- Combine MOTOR TruSpeed Repair with MOTOR's API for labor, parts, maintenance schedules and more for deeper integration into your shop management workflow

COMPANION PRODUCTS

- Parts
- Estimated Work Times
- Maintenance Schedules
- Fluids
- Vehicle premium options
 - VIN search
 - Vehicle search text
 - Vehicle images
- FleetCross

Faster time-to-market and implementation

- Customizable white-label offering eliminates long development timelines and minimizes implementation costs and associated ongoing maintenance
- New content available within days of being published by the OEM

Expansive OEM service and repair content

- Comprehensive content covering component locations, diagnostic trouble codes (DTCs), maintenance schedules, repair procedures, specifications, technical service bulletins (TSBs) and wiring diagrams. Also includes OEM Position Statements and ADAS-related repair details.

Advanced search capabilities

- Advanced “global search” includes ability to dig deep into content—beyond just the headers—to ensure only the best possible matches are presented based on search criteria provided

Single location for all repair details for reduced repair time

- Associated content (related repair details, required tools, warnings) is presented with service procedures in a single location, ensuring that end users do not waste time looking for the data they need

Labor and parts

- Access to MOTOR Estimated Work Times and associated parts to quickly identify required parts and labor times to perform the repair
